* We're as BORUSA ALUMINUM LLC,

* To prevent accidents and environmental pollution or to reach an acceptable risk level by keeping the effects of our activities in terms of Occupational Health and Safety and the Environment under control,

* To meet the requirements of all legal and other conditions we are related to in terms of Occupational Health and Safety and Environment,

* To implement proactive practices in terms of Occupational Health and Safety risks, to ensure their continuity, to prevent risks at their source by ensuring the participation of our employees and employee representatives,

* To ensure the continuity of natural resources by ensuring that they are used in a way that does not harm the ecological balance, and to prevent damages at the source in order to reduce climate change and protect biodiversity and ecosystem.

* To reduce the negative effects of our activities on the environment by increasing the recovery of waste,

* To provide trainings to all our stakeholders that will raise awareness in the field of Occupational Health and Safety and the Environment,

* To take the necessary measures by determining the risks for emergencies related to Occupational Health and Safety and the Environment,

* To review management systems and to implement new practices in order to continuously improve our Occupational Health and Safety and Environmental performance,

WE ARE COMMITTED.
